

What is LifePlan?

The Tom Paterson LifePlan™ Process is a proven, spiritually and behaviorally sound process designed to help you discover your unique design, clarify your life mission, and apply your discoveries to your personal, family, vocational, church, and community life domains.

The LifePlan™ principles have helped top executives and those in business, ministry leaders, stay-at-home moms, working women, and college graduates to maneuver through the crossroads of life and discover how to discern God's path for them, to better balance their personal and work lives, and to be more effective for the Kingdom of God by learning where and how to serve.

"God has a plan for your life," says Tom. "In creating who you are, God simultaneously built into your life what you're to do. When you discover his intent—and fully embrace his design, his plan, his master-thought for you—you will be able to live the life you were meant to live."

The LifePlan™ process brings individuals into a greater awareness of their giftedness and life's purpose. It culminates in the creation of a working plan that carries individuals from their new levels of self discovery to very practical applications in each of the five life domains.

"LifePlanning can be summarized as a 'Discovery Process.' LifePlanning creates the conditions for life enlightenment, breakthrough, and release. Facilitating a LifePlan is a humbling and holy process; we are just the instruments."
